

Certified Tester Foundation Level Agile Tester (CTFL-AT)

The ISTQB® Foundation Level Agile Tester (CTFL-AT) certification provides the key testing skills necessary to successfully contribute to an Agile project. CTFL-AT covers agile testing in alignment with the principles of agile software development as outlined in the Agile Manifesto. A tester on an Agile project will work differently than one working on a traditional project. Testers must understand the values and principles that underpin Agile projects, and how testers are an integral part of a whole-team approach together with developers and business representatives.

Audience

The Foundation Level Agile Tester certification is designed for professionals who are working within Agile environments. It is also for professionals who are planning to start implementing Agile methods in the near future, or are working within organizations that plan to do so.

To gain this certification, candidates must hold the **Certified Tester Foundation Level** certificate.

Exam Structure

🕒 No. of Questions: 40

🕒 Total Points: 40

🕒 Passing Score: 26

🕒 Exam Length (mins): 60 (+25% Non-Native Language)

Business Outcomes

A candidate who has achieved the Foundation Level certification should be able to:

- Collaborate in a cross-functional Agile team being familiar with principles and basic practices of Agile software development
- Adapt existing testing experience and knowledge to Agile values and principles
- Support the Agile team in planning test-related activities
- Apply relevant methods and techniques for testing in an Agile project
- Assist the Agile team in test automation activities
- Assist business stakeholders in defining understandable and testable user stories, scenarios, requirements, and acceptance criteria as appropriate
- Work and share information with other team members using effective communication styles and channels
